

Jorge Heleno

Experience

- 2023–2026 **Staff SRE**, *Singlestore*, Lisbon, Portugal.
Management of 100+ kubernetes clusters across 3 different cloud providers (AWS, GCP, and Azure) using Terragrunt and Tanka. Ownership of the observability stack with Grafana, Loki, Mimir, Pyroscope, and Tempo (LGTM). Development of various tools, scripts, and integrations in golang, python, bash, and Rust.
- 2020–2023 **Senior Devops Engineer**, *Onfido*, Lisbon, Portugal.
Management of cloud infrastructure as code (AWS, Kubernetes, Terraform, Helm, Gitlab-ci). Manage all the monitoring, alerting, logging, reporting application, and business metrics. Advise and implement on application and infrastructure security best practices across the organization. Participate and drive on on-call rotations. Development of developer productivity tools in order to help developers.
- 2019–2020 **Site Reliability Engineer**, *Unbabel*, Lisbon, Portugal.
Management of cloud infrastructure as code (AWS, GCP, Kubernetes, Terraform, and Ansible). Manage all the monitoring, alerting, and logging infrastructure, reporting application and business metrics. Advise and implement on application and infrastructure security best practices across the organization. Participate on on-call rotation.
- 2018–2019 **DevOps Consultant**, *Syone, Alfragide, Portugal*.
Designed Red Hat (RHEL) system architecture for secure file sharing for a client in the banking sector. Implemented Red Hat Openshift and integration with existing infrastructure in major bank and telco. Containerized existing applications. Automated deployment of applications and configurations using Red Hat Ansible for one major ISP.
- 2016–2018 **Systems Administrator**, *RNL, Instituto Superior Técnico, Lisbon, Portugal*.
Manage a small team of junior system administrators. Management of infrastructure (approximately 150 physical machines). Management of distributed computing platform.
- Jul **Full-stack developer (intern)**, *Xpand-it, Lisbon*.
2017–Sept Development of a Rest API to monitor test run times, in order to guarantee quality of service.
2017
- Jun **Front-end developer (intern)**, *Collab, Novabase, Lisbon*.
2014–Aug Development of a new dashboard to report call-center statistics for call-center managers to improve efficiency.
2014

Education

- 2016–2019 **Msc. in Information Systems and Computer Engineering**, *Instituto Superior Técnico*, Lisbon.
Major in Distributed Systems and minor in Software Engineering.
- 2013–2016 **Bsc. in Information Systems and Computer Engineering**, *Instituto Superior Técnico*, Lisbon.
